# Among Oklahoma Public High School Students

### What is the problem?

The 2019 Oklahoma Youth Risk Behavior Survey (YRBS) indicates that among public high school students:

#### Obesity

- 18% were obese<sup>1</sup>
- 18% were overweight<sup>2</sup>

#### **Unhealthy Dietary Behaviors**

- 18% did not eat fruit during the 7 days before the survey
- 8% did not eat vegetables during the 7 days before the survey<sup>3</sup>
- 22% drank a can, bottle, or glass of soda or pop one or more times per day during the 7 days before the survey<sup>4</sup>

### **Physical Inactivity**

- 15% did not participate in at least 60 minutes of physical activity on any day<sup>5</sup>
- 65% did not attend physical education (PE) classes in an average week when they were in school
- 22% watched television 3 or more hours per day on an average school day
- 48% played video or computer games or used a computer 3 or more hours per day on an average school day<sup>6</sup>

# What are schools in Oklahoma doing about it?

The 2018 Oklahoma School Health Profiles indicates that among schools with grades six or higher:

#### School Environment

- 59% of schools had physical activity breaks in classrooms (not including physical education classes)
- 51% offered opportunities for students to participate in sports programs or physical activity clubs
- 73% had physical education teachers or specialists that received professional development on physical education or physical activity during the past year
- 39% served locally grown foods in the cafeteria or classrooms
- 68% placed fruits and vegetables near the cafeteria cashier where they are easy to access
- 74% offered a self-serve salad bar to students
- 56% collected suggestions from students, families, and school staff on nutritious food preferences and strategies to promote healthy eating
- 14% priced nutritious foods and beverages at a lower cost while increasing the price of less nutritious foods and beverages
- $1. \qquad \text{Students who were} \, \underline{>} \, 95 \text{th percentile for body mass index, based on sex and age-specific reference data from the 2000 CDC growth charts.}$
- 2. Students who were ≥ 85th percentile but < 95th percentile for body mass index, based on sex and age-specific reference data from the 2000 CDC growth charts.
- Green salad, potatoes (excluding French fries, fried potatoes, or potato chips), carrots, or other vegetables
- Not including diet soda or diet pop.
- 5. Doing any kind of physical activity that increased their heart rate and made them breathe hard some of the time.
